DETAILED ACTION

This is in response to communication filed on 11/16/05 in which claims 12-22 are pending. The applicant's arguments have been fully considered therefore this case is in condition for allowance. In addition the pending claims have been renumbered as 1-11 respectively.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the prior arts of record fail to anticipate or render obvious the following recited features: a net terminal coupled between the user terminal and an access point associated with a communications network including a first high speed, broadband modem, a second, lower speed, narrowband modem, and first switching circuitry selectively controllable to direct signals to and from the user terminal via the communications network using the first modem or the second modem; the access point including one or more high speed, broadband modems, one or more lower speed, narrowband modems, and second switching circuitry, different from the first switching circuitry, selectively controllable to support a connection with the user terminal via the communication network using one of the broadband modems or one of the narrowband modems; and a controller for controlling the first and second switching circuitry to support the connection as recited in all independent claims and applicant's response 11/6/05.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
